PREFACE

This work is intended to primarily help homoeopathic physicians, homoeopathic students and homoeopathic lovers.

The purpose of an orthopedician is a highly skilled and technical job in the modern allopathic system of medicine. The latest technology and surgical practices have made orthopedics extremely sophisticated. In allopathy, there is a vast reservoir of nomenclature for diseases of orthopedic nature, and when these diseases, with highly technical prescriptions of allopathic orthopedicians are presented before homoeopaths, the latter get into dilemma regarding the mode of treatment. Some homoeopathic physicians take orthopedic diseases as incurable or hardly curable or treatable by homoeopathy.

In fact, this is not true. A complete treatment on homoeopathic principles present a reliable answer to such questions, pseudo-questions or queries. This work deals with all the situations of such a nature.

Homoeopathy has got immense potential to treat and cure non-traumatic orthopedic diseases and manage the post-operative states. One thing should be kept in mind, that while treating through homoeopathy, the holistic treatment of a patient is an acute necessity.

Orthopedics can, definitely not move without surgery, but there are various instances where surgery has been prevented by homoeopathic medications.

Till now, I have not seen any independent work on homoeopathy in orthopedics. Infact, homoeopathy has no philosophy of any type to treat any specific disease or organ, but, there are medicines which situation specifies, and the same is with orthopedics.

In this work, all the relevant homoeopathic medicines

related with any disorder have been kept at one place. This will facilitate readers to deduce the situation *simillimum*.

The salient features of this work are :

1. The first independent work on orthopedic needs in homoeopathy.
2. The subject matter has been enriched by relevant homoeopathic philosophy and modern orthopedic descriptions.
3. Some rare and new remedies have been described for the practice.
4. All the relevant homoeopathic remedies have been discussed at appropriate places everywhere in this work.
5. The focus on direct energy medicines is an additional charm.
6. The emergency medicines incorporated in this work are extremely helpful for any unforeseen situation.

I am of firm opinion that all the references and authorities, which have been quoted, deserve all my the regard, for, without them, I would not have completed this mission.

I am highly obliged to M/s B. Jain Publishers Pvt. Ltd., New Delhi, India, who are publishing this work with such a good sense of sophistication and affection.

I am also greatly indebted to all my supporters, who have stood by me everytime, directly or indirectly, without any fail.

It is a great pleasure for me to acknowledge thanks for the vital help and live support of my mama and mami, Shree Vinod Prakash and Smt. Gyan. Also, Ashish, Bhanu, Arun, Narendra, Vineeta, Rakhee and Savita who have taken deep interest in this work. Deepak and Preeti have also encouraged me always.

The secretarial work has been done very efficiently by

Vivek, Mrs. Rakhee and Shubh. I have no words to give thanks for their great job.

Mr. Arun Nigam, Mrs. Indu Nigam, Mr. Vivek and Mr. Sourabh have always taken deep concern. Thanks to them. Dr. Monica, Dr. A. K. Saxena, Dr. R. C. Pandya and Dr. Suresh Sharma deserve all the regards for their immense help. Finally, I look forward to present this work providing all the philosophical and practical guidance, one may need in the practice of orthopedic cases in homoeopathy.

I will feel amply rewarded if this work proves its utility for human cause. I know, one day it will happen. God is most merciful and great, "AE" will fulfil my desires.

Hari Om Tatsat!!

Humbly yours,
Rajeev Saxena
