## PBEFACE TO THE PIEST EDITION.

THE author does not profess to give, in this small volume, an account of all the ailments incidental to Venery. Such an undertaking would have carried him far beyond the object he has in view, which is, to place before his professional brethren the conclusions he has arrived at, from his own experience, in the homoeopathic treatment of the common Venereal diseases.

English homoeopathic literature is almost silent on these diseases. Following, in his earlier practice of homoeopathy, the few scanty directions contained in '*Jahr*', the author found that the results were not so superior to those of allopathy as he had expected. Some modifications in the treatment were, evidently, necessary. Careful observation convinced him that those modifications must be made in the doses of some of the medicines administered internally, and in a more free employment of external remedies. For many years past he has adapted his practice to these views, and the results have been most satisfactory.

Those results are now submitted to the reader, in no dogmatical spirit, but in an earnest desire to assist in placing the treatment of these diseases on a more simple and rational footing than they at present occupy.

PEEFACE TO THE FOUBTH EDITION.

IN discharging the duty with which the author of this well-known work has entrusted me, of supervising the issue of a new edition, I have endeavoured to bring it abreast of the most recent improvements in the management of the diseases of which it treats, by introducing the results of my own, experience, as well as some additions to the text, and modifications of treatment, contributed by the author.

I have, also, added an entirely new chapter on Spermatorrhoea, on which subject the previous editions have been silent.

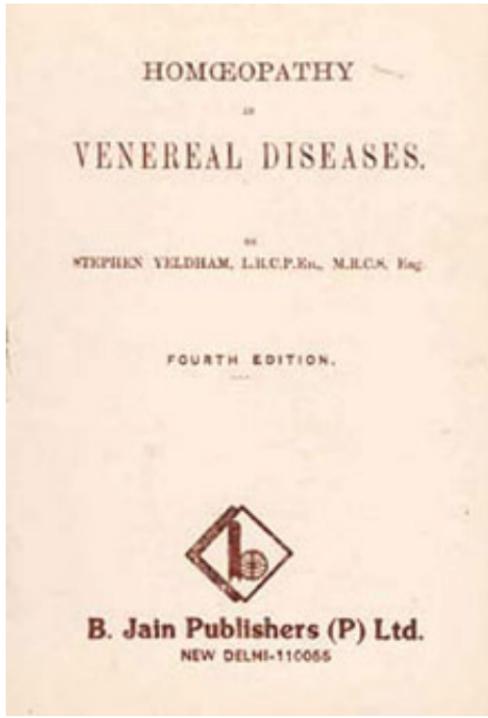

HENEY WHEELEE,

L.E.G.P. Lend., and M.K.C.S. Eng.

*Late Surgeon to the London Homeopathic Hospital.*

53, MOOKGATE STMEET, LONDON, KG.

*June, 1888.*
